

## CHERRY TOMATO: SUNGOLD

Hybrid cherry tomato. Beautiful orange coloring. Typically called candy by those who grow it; prolific producer. Strong disease resistance.

**\$4.50**

## CHERRY TOMATO: JASPER

Hybrid cherry tomato that ripens in clusters, making harvest a breeze. Fruit can remain on the plant longer than other cherry tomatoes due to fruits being crack resistant. Flavor is sweet and rich.

**\$4.50**

## CHERRY TOMATO: CHOCOLATE CHERRY

Good size heirloom cherry tomato; beautiful dark red coloring. Excellent right out of the garden or sauteed on the stove top for a light pasta dish. Savory!

**\$4.50**

## CHERRY TOMATO: SUPERSWEET 100

These are great for harvesting by the “cluster” - you can cut the stem that holds the tomatoes together. Makes harvest of these quick and easy. Sweet with no harsh acidic taste. Plentiful and flavorful.

**\$4.50**

## BRAD'S ATOMIC GRAPE TOMATO (HEIRLOOM)

A large cherry tomato with green skin and streaks of purple and red when ripe! Resistant to cracking and a great option for cooking because of it's sweet flavor.

**\$4.50**

## CHERRY TOMATO: PINK BUMBLEBEE

Cherry tomato with pink skin and gold streaks. Sweet flavor. Beautiful color. The streaks help you know when the fruit is ripe!

**\$4.50**

## CHERRY TOMATO: SUNRISE BUMBLEBEE

A beautiful Cherry Tomato that's colors range from orange to red! Once you start to see the darker red streaks come in, you know these are ripe.

\$4.50

## GRAPE TOMATO: JULIET

Plum shaped fruit that ripens together in clusters. Excellent cooked or raw. Fruit is crack resistant which allows for a longer harvest window. A sweeter mini roma.

\$4.50

## TOMATO: BLACK KRIM (HEIRLOOM)

Heirloom slicer that has a beautiful dark color and is wonderfully juicy for tomato sandwiches! Disease resistant and high yield.

\$4.50

## TOMATO: GERMAN JOHNSON (HEIRLOOM)

Heirloom slicer. German Johnson produces good size tomatoes. Very flavorful. More pink in color.

\$4.50

## TOMATO: STRIPED GERMAN (HEIRLOOM)

Heirloom slicer. Yellow and red coloring, making this a very attractive tomato. Excellent flavor and fruit texture is different from other tomatoes. Large fruit that is less acidic.

\$4.50

## TOMATO: AMISH PASTE (HEIRLOOM)

Heirloom Paste tomato. Large plum fruit that is great for pasta sauces! Also a good option for salsa making.

\$4.50

# TOMATO: SAN MARZANO (HEIRLOOM)

Heirloom Paste Tomato. Excellent flavor for canning, salsas, pasta sauces, etc but can also be eaten raw. Unique fruit shape. Doesn't crack easily so you have a long harvest window.

\$4.50

# TOMATO: CELEBRITY

Hybrid tomato with a uniform, quintessential red tomato look. Disease resistant and DETERMINATE, meaning it has a window of production and is more compact. Great for container growing.

\$4.50

# TOMATO: SKYWAY

Hybrid slicer. Large fruited red tomato, great for sandwiches. Disease resistant and DETERMINATE, meaning it has a window of production and is more compact. Great for container growing.

\$4.50

## TOMATO: BIG BEEF PLUS

Hybrid Slicer. This beefsteak tomato has the quintessential red ripe slicer tomato look, and has been bred to have a better resistance to diseases present in hot humid climates.

\$4.50

## SWEET PEPPER: JIMMY NARDELLO

Italian sweet pepper with a rich, sweet pimento-ish pepper flavor. Perfect for grilling or roasting, and is an excellent producer in the garden. Once they start coming in, harvest when half the fruit is red and half green, and the fruit will continue to ripen in your kitchen.

\$3.50

## SWEET PEPPER: LUNCHBOX YELLOW

Perfect for salads and snacking. Similar to a bell pepper but a quicker fruiting plant that are not as prone to blossom rot as the larger fruited peppers are.

\$3.50

## SWEET PEPPER: LUNCHBOX YELLOW

Perfect for salads and snacking. Similar to a bell pepper but a quicker fruiting plant that are not as prone to blossom rot as the larger fruited peppers are.

\$3.50

## SWEET PEPPER: CUPID BELL PEPPER

Cupid bell peppers are the cutest, heart shaped peppers. The plants have dense foliage with lots of branches, which help protect those cutey fruits from sunscald.

\$3.50

## PEPPER: SHISHITO

These peppers are the length of your finger and have some wavy textures to their shape. They are excellent flash fried in oil and seasoned with salt. Majority of the peppers you'll harvest are MILD but every once in awhile you'll get a hot one!

\$3.50

## HOT PEPPER: CAYENNE

Easy to grow, traditional HOT pepper. Great for sauces and marinades. Can also hang dry!

\$3.50

## HOT PEPPER: JALAPEÑO

Jalapeños produce for a long period of time. Excellent canned for when you need heat in the winter. This variety is a hybrid with good disease resistance.

\$3.50

## NADAPEÑO (SWEET)

Can't take the heat? Nadapeno has the same growth habits of a jalapeno plant, but the fruit is not spicy! Cook and use like you would bell peppers and enjoy the mild jalapeno flavor.

\$3.50

## HOT PEPPER: HABANERO

Helios is an early fruiting variety that's easy to grow in a container garden. Bring inside if you want to perennialize. Nice waxy orange fruit that are great for making hot sauce - SPICY but flavorful!

Expect a large harvest at the end of the season!

\$3.50

## HABANADA (SWEET)

Habanada carries the same smokey notes of a habanero pepper but without the heat. Excellent pepper to incorporate into hot sauces.

These take awhile to ripen but when they do, expect a large harvest at the end of the season!

\$3.50

## EGGPLANT: FAIRYTALE

Only 2-3 inches in length, this small fruiting eggplant has a skin that is purple and white striped. These are easy to cook - just cut right in half to grill or roast whole! No bitter skin.

Pick when small!

\$3.50

## EGGPLANT: ORIENT EXPRESS

Deep dark purple skin, light colored flesh. Another excellent choice for grilling, roasting, stir fry. No need to peel skin off, not bitter. Easy to grow!

\$3.50

## EGGPLANT: ASIAN DELITE

Slender fruit without bitter skin like an Italian variety. No peeling, easy slicing. Great grilled or roasted.

\$3.50

## EGGPLANT: DANCER

The only Italian eggplant variety I grow. Fruit is a beautiful purple pink and is 6-7in. Skin is not bitter so no need to peel. Because these are smaller fruits, they are much less likely to scald in the sun while they ripen.

\$3.50

## HERB: ITALIAN LARGE LEAF BASIL

A staple for summer salads, sandwiches and pesto making, this Basil is sure to please. Keep the blooms pinched off and you will harvest all summer. Can tolerate and benefit from afternoon shade.

**\$3.00**

## HERB: THAI BASIL

Thai Basil has an excellent bright and anise like flavor. Makes a great garnish, is excellent with chicken and shrimp, or the classic use of adding to ramen or pho soups. Also an excellent pollinator attraction.

**\$3.00**

## HERB: LEMON BASIL

Lemon basil is bright and, well, it has an undeniable lemon citrus flavor. The smell alone is incredible and makes for a great cut flower. Bees LOVE THIS PLANT. You will too. Great in cocktails and blended up for a vinaigrette.

**\$3.00**

## CUCUMBER: DIVA

Classic slicing cucumber. Fruit should be picked between 5-7in for this variety. Good disease resistance for Southern growing.

**\$3.00**

## CUCUMBER: SUYO LONG

This Chinese cucumber has unique shapes, and an excellent taste. Bitter free. Long fruit on a plant that can be trellised. Heat tolerant!

**\$3.00**

## CUCUMBER: NOKYA

Uniform, 12" fruit with tiny seeds and dark green skin. The Nokya cucumber is an excellent slicer cucumber for the summer garden, and has been bred to have disease resistance to powdery mildew.

**\$3.00**

## ZUCCHINI: DUNJA

Dark skinned zucchini, Dunja is very disease resistant for Southern growing. Harvest young (fruits grow fast)! Best to grow in pairs for proper pollination so we encourage customers to purchase 2 of the same variety.

\$3.00

## SQUASH: ZEPHYR

Zephyr is a yellow+green summer squash! Beautiful fruit - pick small and pick often. Can be picked and cooked with flower still on. Flowers can also be harvested alone as they are edible! Best to grow in pairs for proper pollination so we encourage customers to purchase 2 of the same variety.

\$3.00

## SQUASH: PATTY PAN

Grows just like you would expect of a traditional summer squash but the fruit has a unique shape and is yellow and green. Flowers are edible. Harvest fruit young and often! Best to grow in pairs for proper pollination so we encourage customers to purchase 2 of the same variety.

\$3.00

## SQUASH: DELICATA

Plant in spring, harvest late summer, early fall. You can eat this winter squash right out of your garden, and the skin is thin enough to consume as well. Beautiful yellow fruit with green streaks and a sweet flavor. Vining plant! You will need space for this to spread or a trellis to climb.

\$3.00

## SQUASH: WINTER ACORN

This variety of Acorn Squash stores well after harvest and can be stored until you are ready to use later in the fall and winter! These are vining plants and need room to spread out!

\$3.00

## BEAN: KENTUCKY WONDER

Heirloom variety from the 1800s. Green POLE bean, so have a trellis planned. Great space saver with high yields. Edible raw or cooked, great for freezing. Stringless when harvested young.

\$3.00

## BEAN: GOLD RUSH

Yellow wax bush bean meaning you don't need a trellis for this to climb. Bushy in habit, prolific producer. Great sweet green bean flavor.

\$3.00

## BEAN: STRIKE GREEN

Green bush bean that is great for cooking, canning, pickling or freezing. Excellent growth habit and heavy producer. Once you start picking, it just keeps producing! Which makes for lots of jars filled for winter!

\$3.00

## BEAN: ANTIGUA

Green bush bean that is great for blanching, sauteeing, or roasting. Dark green bean pod, very uniform in size.

\$3.00

## FENNEL: DRAGON

Grill, roast, or raw, Fennel bulbs are a versatile root veggie in the kitchen. This variety has a long harvest window! You can also use the fronds as an herb.

\$3.50

## KALE: BLACK MAGIC

Black Magic is a variety of Toscano Kale, better known as Dino Kale. Dark, elongated leaves that can be eaten raw, cooked with and used for smoothies. Not bitter and a better texture than curly kale.

\$3.00

## CHARD: BRIGHT LIGHTS

Chard has a sweet flavor when cooked that is very similar to spinach. Chard is also very heat tolerant! The stems on the Bright Lights are pink, yellow, orange. Comes in packs of 4 so that you are guaranteed to have one of each color.

\$6.00

# NAPA CABBAGE: BILKO

Napa Cabbage heads are layers and layers of light airy juicy stemmed leaves. Harvest will occur quicker if grown in full sun, but can tolerate part shade. Great for Kimchi or Slaw. Leaves are large and can easily be used to make a cabbage roll, stuffed and baked.

\$3.00

# ARUGULA

A peppery, leafy green, Arugula is great on a salad or sauteed on the stove. Leaves can be harvested young. Plant all plants in the pot together just as they are to make for an easy harvest. Once you harvested, they will send out another flush of leaves.

\$3.00

# HERB: CILANTRO

Cilantro is a fast growing herb, and benefits from being cut often. It does not like super hot weather, so spring is the perfect time to grow.

\$3.00

## HERB: DILL

A classic summer herb. Lovely in yogurt or sour cream, on fish, with cucumbers, etc. Easy to grow, can harvest young.

And once it bolts it produces a beautiful and huge flower.

Fresh dill is the best way to enjoy this herb.

**\$3.00**

## FLOWERS: OKLAHOMA ZINNIA

Excellent cut flower in vibrant colors. 2 in wide bloom with double petal habit. The more you cut, the more it grows! They also flower earlier than Benary Giant Zinnias.

Colors include: Golden Yellow, Salmon Pink, Pink, White, Carmine, Scarlet

**\$3.00**

## FLOWERS: BENARY'S GIANT ZINNIA

These large blooms are show stoppers. Excellent cut flower in our climate with vibrant colors. 3-4 in wide bloom with double petal habit. The more you cut, the more it grows.

Color options - Salmon Rose, Giant Coral, Lilac, Deep Wine!

**\$3.00**

## FLOWERS: COSMOS

Cosmos can tolerate infertile soil so place these babes in the area of your garden where nothing else grows! Great cut flowers, and the sulphur orange variety are great for hammer dyeing cloth.

Colors: Flizzy White, Fizzy Rose, Sulphur Orange

\$3.00

## FLOWERS: POLLINATOR PACK

The flowers included in our Pollinator Pack are excellent companion plants to all your fruiting vegetables. These flowers are great cut flowers and easy to grow annuals; win win! Your Pollinator Pack will include Zinnias, Cosmos, Lemon Basil and Celosia!

\$15.00

## FLOWERS: GOLD MARIGOLD

These Gold Marigolds are prolific bloomers and can reach 3 ft in height! Beautiful cut flower, beneficial insect host, and the flower heads can be used to make natural dye

\$3.00

## FLOWERS: ORANGE MARIGOLD

These Orange Marigolds are prolific bloomers and can reach 3 ft in height! Beautiful cut flower, beneficial insect host, and the flower heads can be used to make natural dye

**\$3.00**

## FLOWERS: CELOSIA FLAMINGO FEATHERS

Celosia Flamingo Feather has blooms that fade from blush white to pink. These not only make good cut flowers, but are easy to dry for creating everlasting bouquets. Bees also love Celosia!  
Great companion to your garden.

**\$2.50**

## FLOWERS: CELOSIA FLAMINGO PURPLE

Celosia Flamingo Purple have the same feathery spikes of its sister Flamingo Feather, but with rose purple blooms and dark green-purple foliage. **HEAT LOVER!**

**\$2.50**

## FLOWERS: CELOSIA SUPERCREST MIX

Celosia Supercrest Mix come in a range of colors from coral to pale pink to orange. This mix is also a mix of forms and textures, as some blooms are fan shaped, some are feathery spikes.

\$2.50

## FLOWERS: GOMPHRENA

Excellent addition to a cut flower garden or to add a pop of color to a flower bed. A cute name to go with an even cuter flower, these are like gum drops you can enjoy all summer long. They tolerate hot, full sun.

\$4.50

## PERENNIAL: YARROW SUMMER PASTELS

A native plant to North America. Lots of nice pastel colored blooms. Excellent perennial for your garden! Host to pollinators and beneficial insects. Foliage, fern like, looks nice year round.

\$4.00

## PERENNIAL: YARROW LOVE PARADE

Native to north-east Russia, and is VERY cold hardy. We grow this as a cut flower on the farm and love the large individual blooms of the flower cluster. Very different foliage and larger blooms than our native yarrow, and are a faint lavender hue.

\$4.00

## PERENNIAL: RUDBECKIA TRILOBA

Perennial, native flower - Rudbeckia triloba is the star of the late summer garden! These have sprays of small flowers per stem, and they spread each year. Plenty of stems to cut & bring inside while the butterflies enjoy what you leave outside. These typically bloom end of July into August, and the seed heads are beautiful in the fall.

\$4.00

## PERENNIAL: AFRICAN BLUE BASIL

Leaves and flowers be used as an edible herb, or can be used as a landscaping in your flower beds. Can be a great foliage for floral arrangements! Pot up and bring inside during the winter.

\$4.00
